August 29, 2014

KINSMAN WILLIAM C
549 SOUTH FRONT ST
HARRISBURG PA 17104

Beacon ID:
2DCE5 73D5A FFBFF

Dear KINSMAN WILLIAM C,

Thank you for submitting an update to your registration information.

A 15 character Unique Identifier Number (UIN) has been programmed into your 406 MHz emergency beacon by the manufacturer or an installer. The UIN is part of the message transmitted by the beacon when activated. The UIN is also referred to as the Beacon ID in NOAA's Registration Database. Please verify that the 15 character Beacon ID registered with NOAA is identical to the 15 character manufacturer/installer programmed UIN. The Beacon ID registered with NOAA is found on the upper right hand corner of this letter. For most beacons the manufacturer/installer programmed UIN can be found on an exterior or an interior surface of the beacon itself. It is also on the documentation provided by the manufacturer or installer. Please contact the manufacturer or installer if you cannot find or determine the manufacturer/installer programmed UIN. If the Beacon ID registered with NOAA is not identical to the manufacturer/installer UIN, please contact us immediately by phone at one of the phone numbers listed below.

In the event that your beacon is activated the information you provided will be appended to the distress message transmitted to a Rescue Coordination Center. This information is critical for SAR forces to locate you, your vessel, or your aircraft in a timely manner and could possibly save your life. This message is the proof-of-registration for your beacon.

The registration information you have provided has been entered into our database and a file of this information is attached. The updates that were just made to your registration do not necessitate us sending a new decal to you at this time. Decals are no longer provided for Emergency Locator Transmitters (ELTs). Log on to your beacon registration account to update any information at: www.beaconregistration.noaa.gov. **Ensure all your information is up to date, especially the emergency point of contact information.** If you do not have internet access, you may also make the changes on the attached form and return it to us at the address shown below or by fax at: 301-817-4565.

Registration of 406 MHz emergency beacons is mandatory and must be renewed every two years. You are required to renew your beacon registration with NOAA within two years of initial registration or last confirmation. We will email, mail or fax you a reminder approximately two months prior to the two year expiration of your beacon registration.

Please read the beacon owner's manual carefully for instructions on proper installation, operation, maintenance, testing, removal, storage, and disposal of your beacon. Following the instructions in the owner's manual ensures that the beacon works properly when needed and eliminates false alerts which waste valuable Search and Rescue resources. If you have questions about information in the owner's manual please **contact the beacon manufacturer.**

The expiration date on the NOAA beacon registration decal **does not refer to the beacon battery or hydrostatic release expiration.** If you have any questions regarding beacon registration please **contact the NOAA Beacon Registration team** at beacon.registration@noaa.gov (please write "Beacon Registration" in the subject line), or call (888) 212-7283 or (301) 817-4515.

Sincerely,

Christopher O' Connors,
SARSAT Program Manager
